Related subject: Kewstoke boundary proposal

I feel that the new boundary proposal to remove a section of KewStoke and move it to mid Worle is total pointless , it will have no real word benefit on anyone living here all it is doing is serving a purpose for a current councillor who will not be in the same position in 5 years and is trying to give credit to why they need to be in the position they are in, where as the residents will still be living in this area and who actually matter , I believe if you asked every member of the public that lives in the Kewstoke parish if they want it to be changed and sections of it moved they would disagree , it serves no purpose int he real world , since moving to KewStoke my council tax has gone up. So would making part of KewStoke worle bring them back down ? Or will the council be greedy and keep charging us the same higher rate and keep the money ?
