### Comment text:

If you're going to change Ware Trinity and create Ware Rural, the boundary between the two should really be the green belt boundary at the edge of the Ware N&E development as defined in the EHDC District Plan. This has mostly been done but doesn't look right between Moles Farm and the A10.

### Comment text:

Ware Trinity Ward. I think there are two errors in the proposed boundary. The new boundary should follow the EHDC District Plan Green Belt boundary for the Ware N&E development. 1. Near Moles Farm. The boundary should be along the A10 to the Moles Wood and then include the Moles Farm buildings. The proposal seems to follow the Parliamentary boundary across the middle of a field scheduled for development. diagram attached. 2. Widbury Hill. The proposal boundary is in the middle of the field with no obvious features in the landscape. It should follow the new EHDC green belt boundary.
