Comment text:

One priority should be the reduction of the number of councillors to reduce costs and give the reduced number a greater role in the business of the Council. I would suggest that wards with up to 6000 voters should have one councillor, 6000-10000 2 councillors and over 10000 3 councillors. The actual make up of the wards is basically sound but once they grow to over 10000 voters splitting the ward should be considered to create two new wards.
