### Comment text:

Why do we need so many, inflation is rising wages are stagnate and us the public tax payers on abysmal minimum wage pay more and more for councilors. Who are paid extortionate wages with expenses covered!!! I am a nurse who works 13 hour shifts and lucky to get a break to eat we get no subsidiaries. We pay to practice, park our car. The lousy 3% award was taken up by our pensions going into the next pay bracket. We certainly don't need this many councilors we should as a nation be all in this together but no the lowly hard working lower class are penalised over and over again to pick up the pieces and expected to live on the breadline never being able to rise above and make our lives a little bit better. Shame on these governments and councils spending our money on futile false economies. This needs to stop the public are getting tired and restless with their taxes being used for irrelevant jobs that are not needed.
