Annotation 1: We have too many councillors, if possible 11 wards with 3 councillors per ward.

Comment text:

The review doesn't give enough information regarding population levels in the local villages and newly developed areas, so that new boundaries can be constructed to try and form council wards with similar population figures. The exercise needs this data so that we aren't wasting our time redrawing boundaries, only to keep moving them when the population in a ward is more than we are trying to achieve on a balanced ward size.
