Comment text:

I understand there is a proposed change to Norris Green ward, that includes splitting it into three sections with a councillor for each section. Norris Green is a large community it is clearly identifiable and there's also much that is cohesive about it and as partners we work well together. Norris Green has many shared local facilities and community groups and residents move across the ward to use shops, schools, GP surgeries, parks and open spaces that cross the single-ward boundaries proposed. I'd be against splitting into three. Historically, the three councillors have worked well together to serve this area of high deprivation and there's potential for that joined up thinking and approach going forward. I recommend keeping Norris Green as one area with three councillors.
