We the Trench Lock Safer Roads group are opposed to the plans to move our area into Hadley. This would have a devastating impact on our community campaign to secure funding and investment into our roads which are currently blighted by speeding, poor parking and excessive vehicle movement through our small estate. Simply put the work being undertaken by our community has been led by the local councillors and they have ensured that we can put this high on the Councils agenda. We have no links to Hadley and residents are directed by the main Sommerfeld road to the Oakengates centre, they do not travel to Hadley or Trench for vital services. Trench Lock also has strong links to the wider Oakengates town via the network of green spaces, including middle pool, which serves as a natural beauty spot for Wombridge and Trench Lock residents. We would lose our say over some of the best natural spots and green spaces because they would fall outside of the new boundary. In summary, as residents of the area, we are expressly concerned that the campaign for effective investment would be hampered by these changes and we believe that we do not see the wider community as being an area we work, visit and travel to.
