Postcode: RG12 2NL
Organisation Name: Bullbrook Community Centre

Comment text:

Response to the Commission's Proposals for Bullbrook and Harmans Water Wards Bracknell Forest Bullbrook Community has always had a close relationship with the neighbouring ward of Harmans Water, because of the natural boundary of Ralph's Ride (Harmans Water). Working closely with other charitable, voluntary organisations and residents, we strongly maintain that Scott's Hill & The Parks be kept in the Harmans Water ward, as they haven't identified as a community with Bullbrook, as their local amenities are in Harmans Water. The Bullbrook ward as it stands now has a circular bus route which includes most of the ward providing direct contact with the local amenities. The Parks bus service is part of the Harmans Water circular route, which provides direct contact with essential local amenities in Harmans Water such as GP's surgeries, pharmacies, shops, library, churches, schools and community groups. The proposed boundary changes are not supported and this submission is made from a charitable organisation's perspective located in Bullbrook. It should be noted that some local non-profit voluntary organisations have their area name in their title or actually specified in their Constitution such as 'Bullbrook Good Neighbours'. Changes to wards could have a detrimental effect on voluntary groups and result in some organisations ceasing to function. This would impact on the most vulnerable residents who rely on the support and services of these vital organisations. In conclusion we feel that the proposed ward boundary changes referred to above are unnecessary and will cause confusion to residents. The proposed changes will impact on the cohesion of the community and could result in the closure of some non-profit organisations, which would disadvantage local residents. Response to the Commission's Proposals for Bullbrook and Harmans Water Wards Bracknell Forest

Bullbrook Community has always had a close relationship with the neighbouring ward of Harmans Water, because of the natural boundary of Ralph's Ride (Harmans Water).

Working closely with other charitable, voluntary organisations and residents, we strongly maintain that Scott's Hill & The Parks be kept in the Harmans Water ward, as they haven't identified as a community with Bullbrook, as their local amenities are in Harmans Water.

The Bullbrook ward as it stands now has a circular bus route which includes most of the ward providing direct contact with the local amenities.

The Parks bus service is part of the Harmans Water circular route, which provides direct contact with essential local amenities in Harmans Water such as GP's surgeries, pharmacies, shops, library, churches, schools and community groups.

The proposed boundary changes are not supported and this submission is made from a charitable organisation's perspective located in Bullbrook.

It should be noted that some local non-profit voluntary organisations have their area name in their title or actually specified in their Constitution such as 'Bullbrook Good Neighbours'. Changes to wards could have a detrimental effect on voluntary groups and result in some organisations ceasing to function. This would impact on the most vulnerable residents who rely on the support and services of these vital organisations.

In conclusion we feel that the proposed ward boundary changes referred to above are unnecessary and will cause confusion to residents. The proposed changes will impact on the cohesion of the community and could result in the closure of some non-profit organisations, which would disadvantage local residents.
