Organisation Name: resident and PPW

Comment text:

At this time when cut backs are being made, it makes no sense in making changes which will involve costs and reduce funding in the future. The moving of Upper Welland out of Malvern Wells Parish (MWP) to link with Welland will have a negative effect. 1. Upper Welland is linked to the Wells but remote from Welland. 2. The Annual fete for Malvern Wells parish is held on the green by St Wulstans Local nature reserve. Last year 1000 people attended and this raised good funding by the parish. This land would not be available for the wells Parish if the change took place. 3. Malvern Wells Parish has invested money in improving the play area. this would be a lost to the parish. 4. Worcestershire County council will be involved in cost as Rights of Way paths currently in Malvern Wells Parish will have to be re-numbered to align with Welland. This will involve changing and printing the maps used by Parish Path Wardens (PPW's). 5. At least 3 PPW,s live in the change area and they would no longer report to the Wells parish leaving the Wells parish short of volunteers. There may be MWP councilors who live in the area who would no longer sit in MWPC area. 6. The cost and time required to implement this proposal makes no sense when we all need to cut back on unnecessary spending.
