Comment text:

In light of the recent issues within Liverpool City council I would have thought that introducing more councillors was financially unviable. I also feel that increasing the wards would have an impact on government seats and disproportionally give those in power an advantage. I can not see any advantage in this proposal for those living within the wards only advantage to those in power. We would be spending more on councillor salaries than is necessary and reducing the spend that is really required on housing and improving the health of the people of the region this should be the priority. I am therefor apposed to the new ward suggestions.
