There has been a map released that max caller has recommended but this does not reflect the actual areas. We live in L16 childwall but the proposal would move our ward to be broadgreen which is the L14 area of Liverpool. The area of Rocky lane, glendevon road, burford road and staniforth place have a 6 lane motorway and a two line train track in between this area and the proposed new ward so we will be the outcasts of this ward. The areas are totally different too with broadgreen having a large number of flats, hmos and apartments yet this area of L16 that is proposed to move to broadgreen has very few if any. This area of L16 is just as much a part of childwall as any other in L16. We will also be moved into a ward where our views will not be reflected by the rest of the area so elections would be pointless for us voting as this area is totally different to L14 in terms of people make up, age, gender and ethnicity. We would definitely be cut off if the proposal goes ahead and would not be supported as much as we are now whilst being part of the existing childwall area. If you are going to cut childwall up we would be better using the motorway and queens drive as the actual boundary and make us feel part of an actual area.
