To whom it may concern,

I have never seen anything so ridiculous as to put a boundary line through a village when there is a good line already dividing us from South Brink i.e. the river . To put Wisbech St mary with Friday Bridge etc is ludicrous, whoever thought of such an idiotic change. Parson Drove and Murrow have always worked closely together, our Church boundaries are linked. People will NOT go over the river to connect, how on earth can the Councillors interact with each other when they would have to travel 10+ miles each way to have a meeting, and where would this meeting place be held and if the public were to attend how many would travel the distance. O.K. I know it's not mega miles, but it is obvious whoever drew up this idea has no idea of the hardship of getting through Wisbech on a bad day i.e. gridlocked. Murrow has always had this funny little quirk with 3 villages meeting on the Pigeons corner and it's never been a problem, but to cut us in half with the other side of the river is beyond stupid.

What is the funny little bit to the west of March? why is that not encompassed within March

Leave Wisbech St Mary and Friday Bridge alone

Yours sincerely,
