Comment text:

Single member wards best serve communities as the residents can build a relationship with their local councillors thus allowing a more efficient and productive outcome and a greater accountability to the residents. In my opinion it would be better to maintain Shawburch and Dotherington as single independent wards as our councillors currently provide an excellent service for residents in their individual wards whilst ensuring their unique identity and community. Any amalgamation of these wards surely cannot be in the residents best interest and changes the status quo could have a detrimental effect when the evidence clearly shows the current system it is working effectively.
