

It is right that equal numbers of electors elect each councillor. It is important that poorer areas are not subsumed bit by bit into wealthier areas and thereby lose their voice. The large number of students in the area must be fully represented in any election. The proportion of total seats won by each political party should be reflected in the proportion of votes cast for each party. Name the wards using locally identifiable descriptions (e.g. Whitehawk, Roedean and Ovingdean, rather than East Brighton). Investigate the option of 18 three seat wards rather than the mix of three and two seat wards currently.
