I cannot understand why a cut to the number of councillors is seriously being considered ... We have a the massive expansion of housing and population taking place in this borough. If anything we should be considering more councillors...Northfleet Thames bank and South of Northfleet North Wards are having thousands of houses and flats built and in the pipeline under the banner of Ebbsfleet City which is part of Gravesham boundaries. Notwithstanding, the additional housing taking place in Gravesend Central /Town and Gravesend Riverside. Gravesend town is having previous commercial properties converted to housing (more population), the shut hospital also converted plus there's whole lot of flats being built around the heritage/market quarter. It beggars belief that it is even being considered to reduce representation. Where is the democracy and representation in this proposal? Additional ward boundaries and additional councillors I would expect to see not CUTS...this does not bode well for harmony or democracy and I see this causing chaos and social unrest Please, please reconsider. Northfleet, Gravesend town & riverside will need MORE councillors not LESS. I'm furious about this!
