Comment text:

This comment relates to the Bassett Ward. The compilation of the Bassett Local Plan, which was adopted by the City Council as part of its District Plan, subsequently highlighted the significant differences within the ward. The differences in character between the North West area, ie from the West of Bassett Avenue from the northern City boundary including the roads to the North of the M27 to Vermont Close in the South and to the East of the Golf Course but including the area of the golf course known as 'The Practice Field' and, the rest of the current Bassett Ward are such that North West Bassett should become a separate ward in its own right. Clearly a much smaller community than the whole Bassett Ward, it is has many things in common viz, geography, demography, house types, road layout within this proposed boundary which are significantly different to the rest of Bassett particularly those areas to the South of the Ward and to the East of the Bassett Avenue. I would respectfully suggest that this proposal be put forward as a viable change to make sense of the proposed electoral arrangements.
