Comment text:

Firstly, it is very difficult to compare anything when you can only get information on individual wards one at a time. Is there a way of being able to print out the information in total for the area? I am not unintelligent, but I have no idea what you expect us to say about this. As someone who lives in a rural part of the county, I would like to see the representation for these on a par with that of urban Northampton - not by way of per capita, but by way of having as many people who care about the outside parts of the county as there are who focus solely on Northampton. If this gets us an answer to why the rest of us are paying for the grass cutting in Northampton, so much the better. Please urgently review why Northampton residents pay only 60% of the cost of the maintenance charges for grass cutting, tree maintenance and park maintenance as part of the local portion of their council tax, while residents of former DDC and SNC are paying the rest.
