Too many parishes d we by two in kingsthorpe already no action taken on the DCC influx of expensive housing with no infrastructure Who is paying for this when people have no money for essential items? Current councillors never present or visit areas so there are to be more doing the same? No one wanted this change and contacting councils officers horrendous I was told called wrong safeguarding office both offices face different advice there is only o d care act!! If your staff do not know the boundaries and the law what joke do we have for faceless councillors that we have to pay for when you still do T address the safety and condition of where people live No. This must not go ahead
