Comment text:

As a resident of the current Harper Green ward I thoroughly endorse the suggested boundary changes as proposed by the Farnworth and Kearsley first political party. The current Harper Green ward boundary includes swathes of houses that are actually in the Great Lever area of Bolton that have no connection with either Harper Green or Farnworth. On speaking to people in the Great Lever area they do not identify as having any connection at all with what is currently Harper Green ward. The proposed boundary change can only be a benefit for both Harper Green and Great Lever part of the ward so that each will be given their own rightful identify of where they actually live Changing to 2 separate wards of Farnworth North and Farnworth South will help all residents clearly understand which wards they sit in. Also then the previous Great Lever element of the ward will now be able to clearly identify their own ward and rightly be part of the new Great Lever ward for Bolton Similarly all residents in the kearsley wards will also understand better which ward they will be in All these proposed changes will be the best for both Farnworth, Kearsley and Harper Green current wards and hopefully simplify which ward you will be in after the changes
