Comment text:

I wish to make my objection known regarding the proposed changes to Astley Bridge and the creation of the South Turton ward. These proposals which remove several areas of Astley Bridge will divide a thriving community of residents that have worked well together for many years. Residents from across the ward come together at important times of the year such as at Christmas and Remembrance Day, which would not be the same if some residents were removed from the area. The local schools and churches which are used by residents in these areas all fall within the current ward and they contribute enormously to the local community. Local schools provide artwork to the Friends of Astley Bridge to display throughout the ward and they also support community events that are held on Andrew Lane Park. By removing the areas as proposed, it would remove residents that are active in the area from Astley Bridge and place them in a new ward with which they have no connection, no direct road access and no historical links. It would provide no benefit to split the ward in this way, it would only harm the local community which is why I wish to make my views known.
