Comment text:

I wish to express my objection to the new boundary proposals that have been published which will see a number of changes to my local ward of Astley Bridge. I am a resident of Astley Bridge and do not believe that the current proposals reflect the makeup of the local community. The estate centred around Templecombe Drive and Eagley Bank are a real and active part Astley Bridge community with the affected residents being involved with community groups and attending community events that are often organised by the Friends of Astley Bridge Community Group. The Astley Bridge Christmas lights switch on Andrew Lane park, draws people from across the current ward, and brings residents together so it was concerning to read that which under the current proposals that the Park would be located outside of Astley Bridge. Those of us that live locally know that there is no connection between the areas that you propose moving into a South Turton ward and Dunscar, Egerton and parts of Bromley Cross that would make up the rest of the South Turton ward. Many of the roads that are to be moved out of Astley Bridge do not even have direct road access to the new ward they are being moved into. For these reasons, I am objecting to the current proposals as they do not reflect the make up of the local area.
