Comment text:

Being old I dislike changes where they have little to offer except a little saving of money with less representation per head. I have been in Winyates 39 years and have grown to like the area and the surroundings. I feel that this idea will give us less chance to get something done. I also feel that with the deterioration of the bus service it will very hard for a non car owner like me who lives alone and is 83 it will degrade my life. Being in this state I feel that a bigger area for local government will make the local councillors have an increased population to enable them to respond to any problems happening. I know 2 of the local councillors well. I help to run PACT in Winyates and a lot of people worry about this when we have meetings.
