Comment text:

sinfin is under developed, we have Rolls Royce a world known Air plane engine research ,development and manufacturing industry for this one reason sinfin must be developed to international standards with dual carriage way all round RR, roads are full of potholes,no playgrounds for children ,more houses being build but infrastructure not upgraded. MP's are hard to meet, Councilor are unknown ,disable support for road and housing area are poor, yet we pay council tax as required ,if a the current area is so difficult to manage how will the council manage by merging and widening administration ,I have been leaving in sinfin for 24 years and nothing has been changed or upgraded , the from and surrounding area of my house has a old peoples home but it is of more like a prison then a home . I do not oppose change but change must benefit the people who owns the right to quality life.
