Comment text:

Why is the council wasting our money yet again in surveys and meetings etc I also know this is a pointless exercise, because sadly it is already cut and dried. Councillors and the council workers are our subjects, this has been forgotten as they are mainly self serving and not serving the population. In this time of unease, greed, lies and greater divide between the well off and the poor, I personally believe that you should be making the best of what we have focusing on improving lives of our constituents and not frivolously frittering tax payers and council tax payers money unnecessarily, and this feels completely unnecessary.
