### Comment text:

I have tried to keep this communication concise and to the point. I am very concerned about the current proposal. 1. Geographically, Drakes Broughton does not sit comfortably with the other sites. 2. Drakes Broughton does not fit any description of a town, it only comfortably fits the description of a village, admittedly be it a large village. 3. It is misleading to describe it as Urban, I can find no interpretation of Urban that could be adequately used to describe Drakes Broughton. The first Consultation is the best solution proposed, I can understand the reservations of Peopleton residents (I have lived in both villages). A councillor representing the best interests of both villages would be more acceptable and democratic. A Two councillor ward is a very undesirable solution. A large and diverse ward as proposed in the latest consultation will do nothing to meet the requirements of good representation.
