Thanks for this opportunity to have a say on the proposed boundaries. Having reviewed the boundary map, I think there is an opportunity here for better integration of the university areas. The Liverpool Hope University Creative Campus on Shaw Street including the former school The Collegiate Building is an outlier on the current map, being included in the Scotland Road boundary. I think this area should be an inlet including within the Brownlow Hill boundary to connect these buildings with their educational counterparts across the road. Pls consider redrawing the boundaries here to include the first part of Shaw street up to the Capstone Theatre and Collegiate Building so this area is included within the Brownlow Hill boundary to connect them with the remaining educational zone and third heritage located within Brownlow Hill. I know the city is keen on creating quarters or zones which is great, but this one feels somewhat disconnected in its current form. All best wishes ██████████
