Comment text:

We have considerable worries on the impact of the many proposed changes to the Village of Ripley and other nearby villages - including the impact of the future proposal re the A 3 and M 25 changes incorporating the entry and exit at the Ockham roundabout which will be unable to cope with additional traffic to and from the RHS and ultimately building works at the airfield if that goes ahead. No consideration seems to be given on the impact of all the additional enormous vehicles which will need to travel via and through the many small lanes in Ripley which were never created for such traffic. With regard to changes re boundaries for us it should not be considered or discussed until after our Lovelace Neighborhood plan has been accepted in May 2021 following the additional delay in completing re Covid.
