Comment text:

I grew up in Great Comberton (GC) as a child and live here as an adult. One of my maternal grandparents was born in GC and has lived here all her life and the other was born in Elmley Castle (EC) and has lived in GC all his adult life (since 1956). The links are strong between GC, Little Comberton (LC) and EC - they are administratively bound by their AONB association which necessitates a combined and connected response to various development issues. We are all socially bound through church, choir, events, school, sport, youth activities and even social media platforms - connections and ties that do not exist for many of us outside of these 3 villages. Most importantly for me, who can trace back 6 generations between the 3 villages - I have experienced generations of anecdotes and stories, a rich living history, based solely around these 3 villages. While many modern families are widespread I have a parochial family background based exclusively on villages and people in this ward reflective of the northern flanks of Bredon hill. Your proposed changes will result in a spiritual and societal loss for me and I do not support them. Wider AONB issues will not be able to be represented as well as they currently are, at a time when conjoined and representative responses regarding landscape character could not be more important.
