Comment text:

These proposals break up Southborough distributing the parts across 3 or more wards. Southborough is a town with a town council, the Southborough hub and shared outdoor facilities which are managed in a cohesive way by the Southborough town councillors. The proposed wards would result in disparate representation where only a portion of voters in the wards would have an interest in traditional Southborough. Southborough is a well established town with a very strong and long standing community identity. These proposed boundary changes are counter to the civic pride of the inhabitants of Southborough. I am therefore asking that the boundary proposals be reconsidered to take into account the benefits of maintaining the strong community spirit of Southborough.
