I live in Finchampstead North and agree with the proposal to end the division between Finchampstead North and South and have no problems with the proposed boundary of the Finchampstead ward except for a small area west along Barkham Ride. The proposed housing at Rooks Nest Farm and some existing and proposed development nearby will still be in with Barkham but I suggest this area along Barkham Ride most of the way to Commonfield Lane is more identified with Finchampstead as it is contiguous with the existing development along Barkham Ride, up to what should remain as a gap in development beyond Model Farm. The proposed Arborfield with Barkham ward looks rather large, Does the projected population of Arborfield Green mean that this ward is disproportionately large? One way to redistribute some of this would be to transfer the Elizabeth Park area at the south end of Bearwood Road into Evendons ward, where I think it would be a reasonable fit due to it being contiguous with development northwards along Barkham Road and the settlement gap between it and Arborfield.
