**Related subject:** Draft proposals for new payterns of divisions - Hexham East to 'Hexham North'

I disagree with these proposals as I do not believe the new boundaries they intend to create are appropriate to the part of the town and community in which I live.

The proposals suggest our part of the Hexham East community is transferred to 'Hexham North' much of which is semi rural. Being only a few minutes away from Hexham town centre, our area presents a very different set of needs to those living in these semi-rural locations. For example, support for families, housing, social issues, traffic control, street lighting, litter. Under our current councillor, progress is being made to address these issues. I believe this would change under the new proposals.

If the changes were approved, I believe our community would not get the support it deserves and would run the risk of becoming marginalised.
