Since you always ignore local people's views the current system clearly does not work. Houses continue to be built for example on South Normanton despite being contrary to the planning guidelines and resulting in inadequate road access, poor services, and as there is no work in the area everyone has to drive somewhere to work. Please make a proposal where the people who live in an area can veto the unwise and generally poor decisions made by the district and county councils. We can only agree to a proposal that reverses this and puts decisions in the hands of those who have to suffer with the current system
