**Related subject:** Oxshott

Dear Sir/Madam

I have lived in Oxshott for over 30 years having moved here just after getting married. We have bought up a family here and we have stayed because of the friendly and helpful community atmosphere that makes living in Oxshott so enjoyable. It has it's own atmosphere that in my view will be severely damaged if the village is "cut in two". We have a village school, three social entities. sports facilities, a surgery and a station serving a population of circa 5000. We are surrounded by green belt and as such are very self sufficient in many ways with a thriving group of village shops.

At a time when everyone in government seems to want communities to take on more of the social aspects it seems ridiculous to me that you want to take a village that has existed for hundreds of years and carve it up giving as far as I can see no value to any one who lives in Oxshott. Finally, I fail to see how the recommendations reflect community identity. I hope that you will reconsider this part of the BC changes and allow Oxshott to continue as a thriving, supportive community for its residents.
