**Related subject:** Division of Oxshott

Whilst recognising some improvement in the recommendation of LGBCE re the division of Oxshott one further (minor) modification would add great value - making sure that the entire length of the A244 between the two 30mph boundaries (as well as the entire High Street) falls in to one ward only rather than being split artificially at the top of Steel's Lane. This is already a contentious junction at the heart of Oxshott from a traffic and safety point of view and any action required (like the implementation of the 20mph limit) can only be successfully managed where a party has the authority and ownership to act. It is disappointing enough that Oxshott has to be divided but please keep the heart of the village in one ward.
