Organisation Name: Brambles and Thorntree Community Council (Representative of a local organisation)

Comment text:

Related subject: The boundary and Councillors

The Brambles and Thorntree Ward is wrong some parts of the ward are on the wrong side of the road making the people of the parts of the ward feel like they ain't part of the ward and to be fair there not there out of the way and have no connection to the ward.. were how ever neitherfeilds which is in beck fields ward should be part of the Brambles ward as the cross over of people is very high and having them in this ward would work better for the community the community groups and the local councillors too.

There is a major road cargo fleet lane that splits the ward in to different parts but if you used this a boundary line it would help the divid the ward better.

The name of the ward could be East Middlesbrough Ward with four areas of the ward been Boyd's estate brambles farm Thorntree and neitherfeilds then taking away town farm,at Anthony's and some of Pallister park which are all on the other side of the road all taking away area is and should be part of Pallister ward or beckfileds

The community in the Brambles arena is pretty much one and people shop live and many work in parts of it it would help if it was all one and a community could and will be built better it all been one been one.

Now is this area and Middlesbrough Council having money issue surly it would be better if councillors were cut to one per ward what do they really do we do more on the ground they do it's not helping people and the town having so many councillors in wards for me one is enough per

ward.

Two maybe but I personally feel that having one would benefit the town and the ward and more focus could take place with in the wards and help the area and town grow.

I would love to talk to someone and explain how the ward would work and the boundary it's self.

I know most people don't care about boundaries but it's important you get this right for the community and the town.
