I believe that it makes more sense if the whole of a parish is represented by one or more District Councillors rather than dividing up parishes, so have attempted a breakdown by this. This ensures that the Parish Councillors can work with a focused District Councillor. 10 Councillors for Abingdon is no longer appropriate given the growth in population in other parts of the Vale, so I propose that this be reduced to 9. I have not attempted to split Abingdon into individual Councillor wards because it looks as though the ward boundaries should change to reflect the forecast populations and the data to do this isn't available to me. The attached spreadsheet gives the analysis which seems to split parishes into groups which make sense.
