The proposed boundary on your map is not clear, the red line appears to cut through my property, which side of the boundary am I on? Assuming that I'm in the proposed Woodvale district by, it could be as little as fifteen meters, then I object. I'm registered at the Glebe Surgery in Belbroughton. My preferred form of transport is my bicycle, I use it most days, if I have to change my surgery due to the new boundary I would potentially have to drive to a new surgery in a different area thus increasing my carbon footprint and traffic on the road, this might not be part of the consultation but to me is important. I also find it important to keep my doctor for continuity. Belbroughton has been my village for over five decades as it was for my parents. I've been part of the community and I don't wish to change it now.
