Related subject: Ward Boundary

My address is a new housing development and currently falls in the Stainton and Thornton ward and I strongly believe that it should remain in this ward.

Stainton Way forms a natural boundary to the north and separates the development from Hemlington. The B1365 forms a natural boundary to the East and separates us from Coulby Newham.

Both the residents in Stainton and Thornton and the Ward councillor have reached out and welcomed the development in to the community.

Everybody is friendly and approachable and the councillor is often seen around the local area speaking to the newer members of his ward.

I believe that this area is more economically aligned with the residents in the Stainton and Thornton. We already pay a levy to the parish council and feel strongly that we are part of this community and share outlooks and values across the community.

Moving the development into another ward would not only be detrimental to the parish but given the financial position of the council also makes no economic sense. If the council is to work effectively then we should remain in the current ward.
