Related subject: Olney

Prioritise the provision and maintenance of healthcare, education, and infrastructure.

To ensure that residents of Olney are supported in their education, health and transport needs for the greater benefit of society and the general benefit of the local and national economy.

This includes but is not limited to improving water quality in our streams and rivers, highway maintenance (potholes), access to healthcare (GPs, dentists, mental health support), school place provision (funding for teachers) and the general maintenance of public buildings such as schools.

The country as a whole, and Olney in particular, will benefit from establishing a solid foundation for people to rely upon in order to build their lives. With a nurturing home base, decent education, and a safe environment our future citizens will thrive thereby providing the much needed growth and business development we will need in the future in order to tackle an aging population and challenges such as climate change.

Longer term investments are key and this will require bi-partisan co-operation and commitment beyond the usual election cycles. The majority of citizens are not polarised into one side or another; most are centrists who understand the balance between a profit motive and state benevolence to the needs of others.

Single issue politics is dying out (immigration or housing or environment etc.) and is being replaced with a blended concern to balance the needs

of many across a number of issues.

MK Council should blaze a trail as it has done in the past to ensure the balance that is necessary to attend to all needs in a measured fashion.

More councillors reflect the growth of the population and should therefore create a balanced view. MK Council should promote the use of cross-functional and cross-party teams to tackle the most urgent matters and leave the individual's politics at the door.
