## Comment text:

**Related subject:** acresford boundary

Acresford which is a tiny hamlet consisting of less than 30 houses has struggled to establish its identity and existence. The proposals will set the progress of recognition back many years. We are often forgotten and neglected it is only through recent years as part of the oakthorpe and donisthorpe parish arrangements that we have developed an identity. The proposals offer no practical support or recognition of our community. We have no links or actual relationship with geographically or politically with the proposed boundary move.

I am opposed to such a move as are the members of the village who I have spoken with.
