Comment text:

Hi

Just seen that you are reviewing the amount of councillors that wirral need to operate, I would like to suggest that you make the areas bigger and that way you would need less councillors. I know and have known many councillors over the years and all of them told me they get very good money for very little work, with the exception of frank field he said he would do the work for free.

I'm 50yrs old lived here all my life and the area is at the lowest I've ever seen it, my daughter lives in South Korea and hates coming home as she's scared to go out alone. I've contacted many councillors over issues for myself and customers of my past shop and they never email you back with the exception of Jo bird, Jerry Williams and in the past frank field and Moria mcglochlan.

Our new councillors are so out of touch with the area nothing gets done and I've just asked my family and neighbours and the only ones they can name is Jerry Williams, Jo bird, Angela eagle and frank field whom we know passed away but no one knows who replaced him.

On the wirral web page it says due to the pandemic surgeries are cancelled so no wonder they are not communicating with the public there suppose to serve.

I also believe that the councillors and MPs should live in the area they represent as if it's not good enough for them and there families to live in why should they be bothered to improve an area where they don't live as they get paid anyway.

Wirral is not a huge place and I think 66 councillors is far to many you could easily cut it in half and save money on council tax bills for the growing amount of our community living in poverty.

Many Thanks

[REDACTED]
