I agree with the proposals for the changes to the Poynton ward, as per the draft consultation
The split of Poynton into three represented wards establishes the correct proportions and meet the democratic guidelines. There is a strong community identity within the town that will be enhanced with this change.
The changes recognise the local geography and population identities.
The combining of Adlington and Prestbury areas re-enacts a previous position and is well received.
Poynton has a traditional town boundary which has local and borough wide recognition.
