Related subject: Re drawing of council wards

We already have too much government at local and national level. As a council tax payer I want to see a slimmed down council with less councillors, not more. If you want to improve the service to council tax payers then remove red tape, bureaucracy, ineffectual staff, poorly performing contracts and reduce the burden on the council tax payer. Also replace the current ineffectual councillors with some that have a bit of drive and determination.

Remove the computer says no attitude that is endemic across the council. Every contact with the council inevitably ends in a resounding no. The highways department and complaints department need entirely replaced with people who want to actually do some work and solve council taxpayers issues.
