**Related subject:** Nether Langwith

I think that the boundaries that split villages into two such as Whaley Thorns need to be revised, this does not make financial or logistical sense, i.e. different refuse collections for the same village. This became even more evident during Covid with different councils representing the each side of the same road- Portland Road. I also think that roads, pathways and byways that border these areas are neglected for example in terms of refuse collection. The road from Whaley Thorns to Creswell is a good example of this with disgusting levels of litter.
