Only having a single councillor representative will result in a minority view representing the whole. It would be a complete negation of representative democracy. I can only imagine this is being put forward by Conservative Party members (no doubt soon to defect to the racist Reform party) to ensure the plurality of voices in this county do not get a say. Given the strong presence of the Green Party in this county, such a move feels targeted against the progressive, fair-minded populace who live here and deserve a voice. We are not all farmers and wealthy land owners. Their voices do not deserve priority. Given how little info is provided as to why this consultation is being conducted or by whom I can only go by my suspicions as to why such a move would be necessary.
