Related subject: Dringhouses and Woodthorpe ward

I have lived in Woodthorpe for over 20 years. In its current form as a ward with Dringhouses, it has never made sense from a geographic or community perspective. It doesn't make sense that I live on the outer fringe of York wih fellow ward electors who live less than half a mile from York City centre. We don't shop locally in the same places or send our kids to the same schools. It would make more sense to share the ward with people from Foxwood and Westfield as residents of outer suburbs of York where we would have common concerns about bus routes and transport into York, for instance, not shared by many people in Dringhouses.
